Education:

- High School or Equivalent Degree.

Duties and Responsibilities:

We are seeking a Residential Energy Auditor (Energy Conservation Project Coordinator) who will be responsible for visiting customers' homes to evaluate how energy efficient their home is.

The individual in this role will evaluate homes for energy efficiency by completing energy conservation audits, checking the home for insulation, heat loss, air infiltration and inefficient and inoperable heating equipment.

During the audit, we provide homeowners with no-cost energy saving products and information about heating system upgrades.

Energy Auditors make recommendations for insulation, air sealing, and heating system upgrades and help homeowners act on these offerings to help reduce their energy consumption, save money, and be more comfortable in their homes.

If you have any experience in basic residential construction, building science, energy auditing, HVAC, or any related technical experience and are looking to work for a great organization that makes a difference by helping low income customers save money on their energy bills and reduce their fuel consumption, then this is the job for you! Come join our organization and help make homes healthier and safer and help reduce our carbon footprint!

Classroom and field training will be provided to candidates that have the willingness to learn as well as make a difference.

We are an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability or veteran status.
