

We are seeking a dedicated and talented professional for the following opportunity in **Northern California**:

Apply Now <https://goo.gl/BgzRYM>

Certified Trainer

Part-time - Non-Exempt

The trainer is responsible for delivering field, classroom, and lab-based training on behalf of RHA’s technical services department. Training topics and competencies include Energy Efficiency Measures Assessment, Quality Assurance Inspection, Building Science, Energy Audits, Residential Diagnostic Testing and Energy Efficiency Measures Installation. The position will require a strong background in construction with an in depth understanding of residential energy efficiency; especially as it pertains to federal, state, and utility low income weatherization programs. The position will require certification as (or the qualifications to become certified as) an Interstate Renewable Energy Council Certified Instructor or Master Trainer.

Minimum Qualifications:

- Valid California driver's license (or must be able to obtain) with an acceptable driving record and auto insurance
- Interstate Renewable Energy Council Certified Instructor or Master Trainer (or qualifications to become certified)
- Minimum 5 years’ experience in residential home energy retrofits and/or working in energy efficiency programs

Successful candidates will possess the following:

- Excellent communication of technical concepts
- Excellent with residential and/or non-residential energy audits
- Experience conducting seminars, field and classroom training in the field of building science, construction technology and/or energy efficiency
