

Energy Auditor

Now accepting applications for an Energy Auditor to perform Home Performance with Energy Star audits, with the end goal of moving customers through the client cycle to job completion. Your role will be to educate customers about measures they can take to reduce their energy consumption. You'll be able to install energy saving products right away, as well as present a more comprehensive scope of work. This position offers the opportunity to engage directly with homeowners and to communicate best practices in residential energy efficiency.

The Energy Auditor reports to the Audit Program Manager and will work closely with the Home Performance Project Manager. This position is based out of our Laurel office, with service areas in Montgomery, Prince George's, Howard and Baltimore Counties.

Responsibilities:

- Perform energy audits and check ups according to specific program parameters and Elysian Energy standards of practice
- Ability to use modeling software to create audit reports and translate findings to clients
- Write audit reports and job proposals following program parameters
- Interpret and communicate findings to homeowners in a clear accessible manner
- Install and explain various energy saving products such as LEDs, aerators, showerheads, pipe insulation, etc.
- Perform related administrative tasks, some involving use of computers and mobile technology

Requirements:

- Building Performance Institute Building Analyst Certification (BPI BA)
- Two years of energy auditing experience preferred or five years of construction experience
- Valid driver's license with clean driving record and reliable access to an insured vehicle
- Ability to pass background and reference checks
- Capable of lifting 40 pounds

Qualifications:

We will train all motivated candidates with preference given to those with the following:

- Bachelor's or technical degree
- Strong written and verbal communication skills
- Familiarity with residential construction and/or building science
- Previous sales experience
- RESNET certification
- Ability to absorb, process, utilize and communicate technical concepts

A Place to Grow/Benefits:

- Field shadowing
- Additional leadership training
- Mentors with a breadth of experience
- Passionate staff
- Travel expenses stipend
- Health insurance (dental and vision)
- Retirement package
- Tuition reimbursement
- Paid fun day
- Paid volunteer days
- Mascot dog!

The ideal candidate is energetic, personable and self-motivated with a demonstrated passion for contributing to the sustainability movement. Salary is commensurate with experience. Benefits included after a 90-day probationary period.

Elysian Energy is an equal opportunity employer. To apply to Elysian Energy please send your resume and cover letter to our Audit Program Manager, Megan Murray at careers@elysianenergy.com.
