

Energy Auditor

Farrell insulation is currently seeking an energy auditor for Raleigh and surrounding areas. The Energy Auditor will conduct residential assessments to identify energy efficiency improvement opportunities, complete recommendations for the energy efficiency measure including insulation and air sealing upgrades and produce accurate customer energy reports.

Responsibilities:

Conduct full screening audits in homes, entering attics, basement and crawl spaces. Determine insulation levels in both attic and walls.

Generate computerized report for the customer. Track and enter all required program data in an accurate and timely manner. Provide proper and timely reporting of progress.

Encourage homeowners to undertake specific energy saving measure recommended based on the home energy audit. Explain incentives, loans and tax credits for energy efficiency improvements that may be available.

Provide technical guidance to contractors on addressing program or residential construction needs or problems.

Qualifications:

Must be BPI certified.

1-3 years' experience in residential construction, HVAC, building diagnostics, air filtration reduction and sidewall and attic insulation

Computer proficiency, experience with windows-based office applications required.

Strong customer service and client relationship management skills and enthusiasm for energy conservation.

Starting salary \$40k + commissions.
