

Position: Field Team Member/Installer**Key Job Responsibilities:**

- Assist energy auditors in conducting residential energy audits to evaluate homes for energy efficiency and health and safety
- Assist energy auditors in using diagnostic tools to identify areas for energy savings
- Work with crew leaders and field team members to perform select retrofit measures such as air-sealing and insulation of the building shell, installation of energy-efficient lighting and water-saving measures, select HVAC work
- Help maintain detailed client files
- Work with other team members to ensure a quality install
- Maintain strong ongoing communication with crew leaders, office staff, and clients
- Assist in educating clients about energy efficiency

Certificates, Licenses, and Background:

- High School Diploma or equivalent required
- Construction experience required. Special consideration given to candidates with demonstrated experience in a field related to construction, HVAC, plumbing, electrical, or carpentry
- Current and valid driver's license with a clean driving record
- Ability to drive commercial vehicles (e.g. work van, box truck)
- Clean record with ability to pass various background checks

Preferred Professional Skills:

- Excellent problem solving skills with ability to analyze situations, identify existing or potential problems, and recommend solutions
- A background in building science or weatherization is a strong plus

Working Conditions:

The work we do is performed both indoors and outdoors in all types of weather. The work may involve climbing ladders, working in confined attics, crawl spaces, and basements, or working in homes of deteriorating condition. Employees must be able to work in these conditions in residential, multi-family, and commercial environments.

About True Management, LLC:

Established in 2012, True Management LLC is an energy-efficiency construction company that specializes in providing detailed home energy audits for residential and multi-family customers. With our practices rooted in the Building Performance Institute's standards, True Management utilizes diagnostic tools such as blower door tests, zone pressure diagnostics, CAZ testing, infrared technology, and visual inspections to thoroughly assess each home. In an effort to understand the house as a system, we use these diagnostic techniques, analyses of utility usage histories, and interviews with residents, to develop recommendations for weatherization strategies that are tailored to each home and the people who live in it. With an eye for health and safety, we use this information to craft detailed work orders, which span a range of energy-saving improvements from air sealing and insulation, to ventilation improvements, to LED lighting, to heat pump water heater installations. Our hard-working crews install these improvements with careful consideration given to each step to maximize the energy-saving potential for our customers.

- Services we provide: Energy Auditing & Consulting, Diagnostic Testing, Blown-in Insulation, Spray Foam Insulation, Water Heaters / Heat Pump Water Heaters, HVAC Improvements and Modifications, Exhaust and Ventilation Solutions
- Office and warehouse located in Freemansburg, PA
- We work in Lehigh and Northampton Counties (Lehigh Valley and surrounding areas)
- We focus on quality over quantity - we take pride in our work!
- We are an established company with a reputation for exceeding customers' expectations
- Competitive compensation and select benefits
