

NYSWDA's Energy Efficiency Training Center in East Syracuse is seeking a dynamic, knowledgeable full-time HVAC tradesperson with extensive heating and air conditioning experience to train in an adult learning environment.

New York State Weatherization Directors Association (NYSWDA) is an award-winning nonprofit member organization and is seeking a motivated team player to provide HVAC/energy efficiency related trainings in a lab/classroom setting and assist in the development of new trainings. This is a great opportunity for someone working in the HVAC industry to take the next step in their professional development and positively impact New York's HVAC industry, client lives and housing.

Qualified candidates must possess a broad and varied background in HVAC. Experience in building science and/or BPI certification a plus. Vocational training experience a plus but training can be provided for this role. Must possess EPA 608 Universal Refrigerant Certification and basic HVAC hand tools. This position has regular hours Monday through Friday with no nights or weekends.

Salary based on experience, lucrative benefit package. Vehicle, equipment, and tools provided when training off-site, some travel required.
