**Additional Information:**

Home Diagnostic Solutions Inc. (HDS) is an independent home inspection company, specializing in diagnosing and recommending solutions to the problems that cause comfort issues and energy inefficiencies in new and existing homes. HDS currently administers Jackson EMC's "Right Choice" new home energy efficiency program and their "Home Performance with Energy Star" existing home program. HDS also serves as a consultant/contractor for the home improvement programs at Georgia Power. We also serve independent contractors and homeowners for their energy testing and consulting needs. We are based in Lawrenceville, GA and currently cover the Metro Atlanta area and parts of North Georgia.

**We are growing. We need qualified people to help us grow. The speed and limit of your personal growth within the team is in your hands. There are plenty of opportunities here.**

-New hires start in an Equipment Specialist role. Equipment Specialist is like an apprentice role. Once the Equipment Specialist becomes proficient in setup, use, and break down of all equipment, he/she may advance to the Field Technician position.

-Field Technicians are capable of: getting to jobsites with all appropriate equipment and supplies, leading and/or performing the jobsite duties, and reporting all findings in a professional manner.

-Field work consists of testing, inspecting, auditing, and consulting in new and existing residential energy efficiency.

-Team members must be well spoken and well written. Communication and follow up are essential to our business.

-All who apply will be required to submit a drug screening and back ground check. A valid driver's license is required and all team members must be approved for company insurance.

-Our work includes physical exertion, climbing ladders, working in attics and crawlspaces, etc. You should be able to lift at least 50 pounds and work in the heat of summer and cold of winter.

-Apply if you are interested in becoming part of a good team and working with good people in a career where you have control of your own upward mobility.
