## WEATHERIZATION CREW MEMBER – ENERGY CONSERVATION

We are a rapidly growing home energy conservation/weatherization company seeking the right individual for an immediate full-time career opportunity. We will give top consideration to those who have a minimum of 2 years of field experience as an energy conservation/weatherization technician to join our team.

This position will be required to:

- Install weather-stripping
- Blow cellulose insulation
- Having knowledge of sidewall insulation application is a plus
- Sealing air leaks and various penetrations with a variety of materials
- Replace windows and doors
- Seal duct work
- Insulate heating system pipes
- Caulk around windows
- Installing fiber glass insulation
- Other functions as needed

The individual applying for this position must:

- Have a clear background due to the sensitive nature of the work
- Have a clear and valid driver's license
- Pass pre-employment drug screening
- One year of residential construction experience is preferred
- Have a high school diploma or GED
- Provide proof of citizenship

Due to the nature of the work and the environment, the Field Technician must have full range of body movements including use of hands, and be able to perform considerable stooping and kneeling in tight confined spaces.

Field Technician will need to be highly organized and schedule-oriented. This is a position which requires the individual to follow instructions. A technical background and knowledge of residential construction/remodeling is strongly encouraged.

This is an excellent opportunity for motivated individual looking for professional development in an expanding industry. We provide an environment that will further your knowledge, experience and growth. **Training for BPI certifications available for motivated candidates.**

Hourly pay; rate depending on experience. Please reply with your resume and proof of any certifications. Training for BPI certifications available for motivated candidates.
