

Job Opportunity: Building Science Specialist

Slipstream creates, tests, implements, and scales the next generation of solutions that move us farther, faster toward a clean energy economy. You are the key to the success of our organization by demonstrating our values, engaging in our mission, and creating results that will produce enduring economic and environmental benefits for all.

We partner with governments, philanthropies, and utilities to discover, test, and scale new solutions that save - and decarbonize - energy. We collaborate with communities of color, rural communities, and Tribal Nations to address historic inequities in the health and economic benefits of clean energy. We're optimistic, ambitious about our impact, and on a journey to become increasingly inclusive and equitable in our work.

Slipstream recognizes and values the importance of diversity and inclusion in enriching the employment experience and its mission. We are committed to attracting and retaining employees with varying identities and backgrounds. This position requires someone located in the Madison, WI area or within a reasonable commuting distance and will include some travel.

You can make a difference for climate and equity. Put your expertise in building performance to work building an equitable, clean energy future. Slipstream seeks a building science specialist to perform home energy assessments, inspections, diagnostic testing, and training.

We are seeking a Building Science Specialist (BSS) with exceptional attention to detail who thrives in a fast-paced environment. The BSS will manage multiple priorities in a collaborative team environment. Our ideal BSS has a track record of completing residential quality assurance site visits - ensuring energy efficiency measures and installations meet program specifications. The candidate has the knowledge and ability to complete diagnostic testing and analyze results for heating system combustion analysis, blower door testing, carbon monoxide measurement, gas leak detection, zonal pressure identification, infrared scanning, and blower door air leakage measurement. As a key member of our Training and Technical Services Team, the BSS assists or leads the development and delivery of quality technical training and support materials for energy efficiency professionals.

Show us how you collaborate and how you strive to include perspectives to drive better ideas and enhance efficiencies. You're a team player - whether leading a team or participating. You're a great communicator, presenter, and educator. Slipstream supports a hybrid work model. Our

BSS can be located anywhere but must be willing and able to travel within the state of Wisconsin or surrounding states several times per month.

Objectives of this Role

- Conduct quality assurance field site visits
- Assist or lead the development and delivery of technical training and support materials.
- Provide technical support related to building science expertise.
- Conduct or assist building science research activities.
- Provide information for review of data and monthly reports.

Skills and Qualifications

- Bachelor's degree or equivalent work experience
- Excellent written and verbal communication skills
- Minimum of three years work-related experience
- Basic proficiency in using Microsoft Office Suite
- [Building Performance Institute](#) (BPI); Home Energy Professional (HEP) Energy Auditor; and/or Quality Control Inspector (QCI) certification required; or the ability to become certified upon hire
- Exhibit ability to perform diagnostic testing and analysis related to home energy assessments, quality assurance inspections, and training
- Demonstrated ability to incorporate residential building science best practices.
- Knowledge of the Department of Energy Weatherization Assistance Program
- Ability to travel throughout Wisconsin and surrounding states on a regular basis
