

**The Field Operations Supervisor is responsible for managing and supervising the activities of the Field staff. This individual is available to respond to questions throughout the day, to ensure production goals are achieved and work performed is in compliance with CMC, client and utility program procedures and guidelines. This individual will direct and coordinate field programs to ensure maximum productivity, energy savings, quality assurance and customer satisfaction.**

#### **ESSENTIAL FUNCTIONS:**

Manage, coach and mentor direct reports to ensure staff is performing effectively and at their highest potential to achieve program and company organizational goals. This includes interviewing, planning, assigning, completing performance evaluations, coaching, and directing work.

Provide mentorship and ongoing trainings for technicians, including team meetings as scheduled by program and address issues and/or concerns.

Establish and implement operational, production and energy saving goals for the team. Make recommendations to improve work performance.

Responsible for the management of inventory materials as required by location, ensuring staff are properly equipped to complete work in a timely manner. Responsible for the maintenance and storage of company equipment, vehicles and materials as required by location.

Perform site-visits, audits and inspections as needed and ensure all work is performed in accordance with company and program guidelines.

Responsible for dispute resolution of customer concerns both on-site and remotely while maintaining same or next day business turn around.

Act on-site to bring substandard measures and installations up to program standards when possible. Install program measures when needed.

Assess work orders to assign crews appropriately to maximize team utilization and collaborate with the Customer Care Department to coordinate schedules and to verify jobs are completed timely.

Supervise the maintenance of accurate records, photos and proper documentation of all field operation activities including recording and reporting metrics department wide as needed. Monitor and respond to inspection results in the program database as required by location.

Maintain relationships with utility representatives and third-party inspectors for field inspections. When necessary, accompany third-party inspectors on on-site visits and mentoring sessions.

Serve as liaison between audit field staff, quality control department, and customer care center staff.

Stay current with industry trends and standards.

Disseminate and implement program changes as they occur.

Reinforce customer energy education on-site and ensure customer satisfaction.

Produce daily, weekly, and monthly reports as requested.

Conduct research and analysis of field staff data for use in metric compilation as requested by management.

Support safety programs and regulations implemented company wide.

Support and implement technical advancements in the field as they become available.

Manage supplied inventory materials and company issued equipment.

Ensure that work is conducted in compliance with OSHA and company safety procedures.

Perform other duties as assigned.
