

ENERGYPRO

Energy Efficiency Specialist (Home Energy Auditor)

The Energy Efficiency Specialist will be responsible for educating homeowners about energy efficiency practices. The Specialist will analyze the homeowner's energy efficiency, promote, and encourage the adoption of sound energy efficiency recommendations, and install instant savings measures such as LED light bulbs and water heater wraps.

As a representative of the company, the candidate must present a clean, professional image and clearly communicate with supervisors, homeowners, and inspectors. It is required that the candidate have a thorough understanding of home construction, accurately identify framing members, and photograph and create written documentation of site conditions and these requirements. The position will handle site visits, inspections, service calls, technical troubleshooting, and project closeout.

Duties & Responsibilities:

- Work independently to conduct energy audits - This includes traveling to the customer site location, interacting with the customer, performing a comprehensive assessment/audit of the residence, recommending energy-saving measures, conducting energy usage data calculations, and completing corresponding documentation.
- The individual will also maintain accurate supply inventory weekly.
- Perform energy audits and record findings (e.g., blower door, insulation level, thermostat type) and download/upload the required forms and worksheets.
- Where appropriate, advise customers of simple low- and no-cost energy conservation measures, such as sealing air leaks and changing furnace filters.

Qualifications & Requirements:

- **Must have a valid driver's license & be approved to drive a company car**
- At least 1 year of Energy Auditing experience is preferred.
- BPI Analyst Certification is preferred, HVAC Certificate holders welcome.
- A self-starter with the ability to keep on task independently and complete reports in a timely matter.
- An excellent communicator that can explain building science details both orally and in written format.
- Solid foundation in utilizing Microsoft Office products, with a particular focus on Word and Excel.
- A basic understanding of residential home construction.
- Ability to pass a background check.
- Must be able to lift to 40lbs and climbing on ladders.
