

Weatherization Manager Job Posting

We are looking for a residential energy efficiency expert that can lead a team of technicians performing residential home energy efficiency weatherization improvements. The weatherization supervisor position is a hands-on job and will perform home energy efficiency improvements consisting of:

Working in attics and crawl spaces:

- Perform blower door tests
- Blow in insulation. Either fiberglass or cellulose.
- Use spray foam to seal cracks and other air leaks going into the attic.
- Add Foam board to knee walls and seal.
- Add radiant barriers to attic ceilings.
- Sealing duct work in the HVAC ducts with mastic.
- Adding or replacing plastic vapor barriers.
- Installing attic stair covers.

Other work:

Replacing door and window seals and caulking around them.

Adding a hot water heater blanket.

The perfect candidate would be BPI Building Analyst certified and be able to perform Energy Audits using blower door and thermal camera, etc. Understand combustion safety in homes.

Job Requirements:

- Hands on remodeling / construction experience preferred.
- Ability to work in crawl spaces and attics.
- Have your own transportation.
- Excellent customer service.
- Very organized and ability to manage a team of 2 – 3 others.
- Pass a background check.

Job Type: Full-time

Pay: \$900.00 - \$1,400.00 per week
