

General Summary:

Home Energy and Comfort, Southeast Pennsylvania's only BPI GoldStar Contractor focused on whole home performance, is looking for an Insulation and Weatherization Technician to support the installation of home performance recommendations in primarily residential settings. The ideal candidate will be punctual, hard working, and good at communicating with both staff and customers. We are looking for a motivated individual with a desire to learn, secure long-term employment, and help people and the planet.

Either BPI credentials or experience in the home performance industry are preferred. However, we will consider candidates that do not. Preference will be given to candidates that at least have experience in the building trades. Please send a brief cover letter explaining your interest in the position, a professional resume, and a list of at least 2 professional references to ben@energyandcomfort.com. No phone calls please. Email with any questions. We are conducting interviews on a rolling basis until the position is filled.

Hourly wage is dependent on experience, training, and certifications and shall be no lower than \$14 an hour. Technicians typically earn \$14 - \$18 an hour. A typical work week is 32-40 hrs with overtime available some weeks. Worker's Compensation, paid holidays, and earned vacation time provided. Annual bonuses and pay raises provided based on performance. Preference will be given to candidates residing in Chester County, PA but we will select the person that best fits for our company for the long term.

Work Experience Requirements:

- At least 1 years of experience in the building trades
- Experience in the weatherization and insulation trades preferred

Education/Certification/License Requirements:

- High school diploma or GED required
- Associate's or Bachelor's degree preferred
- BPI, HERS, and/or LEED credentials strongly preferred
- Must have valid PA driver's license and safe, reliable transportation

Computer Skill/Training Requirements:

- Basic knowledge of and experience with computers, tablets, smart phones
- Building science, carpentry, and/or construction training/experience

Primary Responsibilities:

- Review work scopes and prep/plan for installations (10%)

- Travel to and from job sites using personal transportation and/or company vehicle (10%)
- Installing home performance recommendations including insulation (fiberglass, cellulose, spray foam, rigid board, etc.), air sealing, weatherization measures, as well as associated prep and clean up of project sites (80%)

Environmental Conditions:

- Work is physically demanding and involves working in challenging environments, while maintaining focus and attention to safety and detail.
- Work areas are typically residential attics, basements, and crawl spaces.
- Temperature extremes are often present, including both very hot and very cold.
- While all safety practices and BPI standards are followed, employee may be exposed to lead paint, asbestos, mold, mildew, exposed electrical wiring, and other safety hazards during the course of daily work.
- We will provide all safety equipment for employee to work safely and effectively.

Physical Requirements:

- Must be able to lift 50 lbs. regularly and occasionally 75+ lbs.
- Must be able to work safely and effectively in extreme temperatures and conditions
- Must be able to work safely and effectively in tight and confined spaces
- Must be able to smile and have a good time even on a tough day
- Good sense of humor highly recommended and preferred

Please send a brief cover letter explaining your interest in the position, a professional resume, and at least 2 professional references to ben@energyandcomfort.com. No phone calls please. www.EnergyAndComfort.com
